My favorite tool is PhotoPaint, which is a free program that comes bundled with Windows. Even though PhotoPaint was made for the Mac, you can run it on a Windows machine and get very good results. Check out www.photopaint.com for more details. Lightroom is Adobe's new professional photo editing software that you can use to edit images from your Nikon, Canon, or Olympus camera. Lightroom is also available for Mac users and includes many of the features of Photoshop. If you're working on a budget and need a more basic image editor, you might consider Windows Paint, which comes installed with Windows. Windows Paint isn't really a great tool for photo editing, but it's great for fine-tuning images. **Figure 7-2:** Photoshop allows you to work at an extremely high level of detail. The Photoshop Workspace The Photoshop workspace is where you make all the changes to your photos. The workspace holds a series of image tools for you to work on, like the Brush tool. There's also a Zoom tool and a History tool, all of which I talk about in the following sections. At the top of the workspace, shown in Figure 7-2, you can see your image, the tools you use, and a couple of action buttons. The tools you use are listed along the left side of the screen. The lower left side of the Photoshop workspace has some buttons that you can use to zoom in and out of your image. If you need to work in a tight frame and want a closer view of your subjects, use the Zoom In and Zoom Out buttons. The Zoom tool works great in tight situations and enables you to scroll through the various layers in your image. Use the History button to save or discard your image's previous edits. The History button allows you to go back up to a previous version of your photo. If you've edited a photograph and decided that you made a mistake, use the History button to return to a previous version of the photo. Then you can make the changes you want again. The upper left side of the workspace has two small buttons: the Sponge Brush tool and the Eraser tool. The Sponge Brush Tool is used to make changes to your images by applying coloring or shading. The Eraser tool is used to remove selected areas of your image. Because the Sponge Brush tool works by dabbing color onto your image, a layer of transparent color is

Kurt Nimmo Infowars.com July 2, 2013 Obama sympathizer Joe Biden played John Yoo on Comedy Central's Daily Show. They quipped about a deluded zealot like Yoo's torturing of a 9-year-old Guantánamo prisoner. Biden is a coward who leaves his mama to raise the boy, and his mama had some choice words for the veep's performance. Biden doesn't get to play the victim. Biden must resign because he doesn't have a backbone. On the Daily Show, Biden looked at Yoo and said: "You're either full of it or you are the bravest son of a bitch I ever met." The ACLU said at least one of the boys was hooded for 30 hours with only water to drink. Biden is upset about the treatment of a child? "I think it makes you sick," Biden said. "I can't imagine someone torturing someone." Biden must resign for supporting the actions of the president and his fellow colleagues who approved the torture of children.
